

Fabian Oswaldo Montoya Palma

Full Stack Engineer | Automation Engineer

Nicaragua - fabianmontoya2802@gmail.com - +505 8771 5943 - <https://fabmnt.dev>

Full Stack Engineer with 3+ years building internal systems, automation tooling, and AI-integrated workflows for operations teams. Strong in React, Next.js, Angular, Node.js, .NET, Python, and data-heavy interfaces, with experience supporting 150 internal users and increasing verification throughput by 10x.

Professional Experience

Dentalrobot.ai

Oct 2022 - Present

Full Stack & RPA Developer

Automation company focused on high-volume dental appointment verification for U.S. insurers.

- Maintain and extend CC (Control Central), the company's cross-team workflow management system used by 150 internal users, improving Angular-based UX, accessibility, stability, and scalability.
- Built Formless, a browser-based editor for table- and bookmark-driven patient audit forms, replacing fragile DOCX editing workflows and moving audit review directly into the main system.
- Developed the Parallel Engine in Python to execute verification robots concurrently, increasing patient verification throughput by 10x in the same time window while keeping resource usage controlled.
- Built the Rocketbot Interpreter with FastAPI and Docker Compose using Python 3.12 and 3.6 services, centralized logs, reproducible debugging, and parallel execution support, eliminating the complex Windows setup previously required to test and review robots with real company data.

Roca Company Solutions

Apr 2025 - Mar
2026

Frontend Web Developer

Company providing DMV, vehicle insurance, and product operations services in the U.S.

- Built the frontend from scratch for Maya, the company's first operations dashboard for DMV cases, insurance, products, invoices, and service management, delivering the initial system in 3 months with React, Vite, TanStack Query, and TanStack Table.
- Designed spreadsheet-familiar interfaces and helped migrate high-volume operational data from Google Sheets into Maya, reducing friction for existing users moving into the new system.
- Implemented exports to XLSX, PDF, and images and optimized data-heavy modules for fast rendering across cases, clients, products, insurance, users, and logs.

Freelance

- Built and maintained websites for small organizations with WordPress and other CMS platforms, including ASOHUMA, with features such as SEO, event calendars, forms, email delivery, and WhatsApp integration.

Technical Skills

- Frontend: React, Next.js, Angular, TypeScript, Astro, TanStack Query, TanStack Table, Redux Toolkit, Zustand.
- Backend and APIs: Node.js, FastAPI, .NET, REST APIs, SQL Server, MySQL, Supabase, MongoDB Atlas, AWS RDS.
- Automation and testing: Python, Selenium, Playwright, BeautifulSoup, scraping, workflow tooling, and data analysis.
- AI integrations and product workflow: frontend AI integrations, backend AI integrations, internal tooling, and operations-focused interfaces.
- UI and developer workflow: Tailwind CSS, shadcn/ui, React Aria, Bootstrap, GitHub Actions, Vitest, Testing Library.
- Languages: Spanish (Native). English: Fluent reading and listening, intermediate writing, basic speaking.

Education

- Information Systems Engineering, Universidad Nacional Autonoma de Nicaragua - Leon, graduated 2024.
- International Ethical Hacking and Cybersecurity Course, Universidad Nacional de Ingenieria, 2024.
- General Accounting Technician, Instituto Nacional Tecnológico, 2024.
