Professional Career

Dentalrobot, Inc.

Oct 2022 - Present

Dentalrobot is a high-volume dental appointment verification automation company for U.S. insurer websites. I work as a full stack developer maintaining frontend and backend web systems, refactoring legacy code, and developing new projects and features.

- Maintain and develop projects and new features for the company's main management system CC (Control Central) in Angular, prioritizing user experience and accessibility, code robustness and scalability, ensuring the stability and ease of use of the system for all company users.
- Designed and implemented the web Formless editor, which allows for the creation, visualization, and inline editing of forms based on tables and markers. Formless eliminated the constant corruption of DOCX files and almost entirely removed the use of these files, saving storage space and streamlining the editing and saving of forms directly from CC.
- Developed the Parallel engine, a resource and process management program developed in Python. This engine allows the execution of multiple RPA robots in parallel, which drastically increased the number of verifications performed in the same timeframe while keeping resource usage to a minimum.
- Developed modules for the Rocketbot platform and web scraper robots, both owned by the company, using advanced data extraction techniques in JavaScript and Python.

Roca Company Solutions

Roca Company Solutions is a company that provides management services for the DMV, vehicle insurance, and product sales in the U.S. I worked as the Frontend Developer, in charge of the design and development of the Maya management system.

- Completely designed and developed the frontend of the company's DMV case, insurance, and product management system, using modern technologies such as React, Vite, React Router, TanStack Query, TanStack Table, among others. Large volumes of information previously stored in spreadsheets were migrated to the new management system called Maya.
- Optimized the Maya system to render large amounts of data and maintain excellent performance. Each module (DMV cases, clients, invoices, products, insurance, users, logs, etc.) has minimal rendering time and an interface oriented toward Google Sheets users, resulting in a great user experience in every section of the system.
- Implemented data export functionality to XLSX, PDF, and image files. This preserved a familiar experience for users accustomed to Google Sheets and made it possible to extract portable files directly from the system, facilitating the migration of registration, handling, and tracking workflows from spreadsheets to Maya.

Freelance

- Created the website <https://asohuma.org> in WordPress for the Center for Study and Social Promotion of Human Rights Association (ASOHUMA) using plugins for SEO, event calendar, contact forms, WhatsApp integration, email delivery, among others.

Technical Skills

- Programming Languages: TypeScript, JavaScript, Python, C#, PHP, SQL.
- Frameworks and Libraries: React, Angular, NextJS, Astro, React Router, TanStack Query, TanStack Table, TanStack Form, React Hook Form, Redux Toolkit, Zustand, Rechart, Selenium, Beautiful Soup, Playwright.
- CMS: WordPress, Strapi, Shopify.
- Databases and Cloud Services: MySQL, SQL Server, Supabase, Convex, AWS RDS, MongoDB Atlas, Neon Serverless, Turso DB.
- Web Styling: HTML, CSS, TailwindCSS, shadcn UI, react aria, Bootstrap, Tabler.
- Best Practices: SOLID Principles, clean architecture, pair programming, code review, GitHub Flow, implementation of unit, integration, and E2E testing.
- Languages: Spanish (Native), Basic English (reading and writing).

Education

- Information Systems Engineering (Universidad Nacional Autonoma de Nicaragua) 2019 - 2024.
- International Course on Ethical Hacking and Cyber Security (Universidad Nacional de Ingenieria) 2024.
- Technical Degree in General Accounting (Centro tecnico para la Administracion y Economia Ruben Dario, Chinandega) 2016 - 2018.
- Bachelor of Science and Letters (Centro tecnico para la Administracion y Economia Ruben Dario, Chinandega) 2018.
